

Vision for the Third Millennium:

The Age of Re-embodiments

The Age of Re-embodiments is the exit from the ecocidal mode of being which is the one that follows from the excesses of Wester(nised) modernity and postmodernity alike. It entails root-and-branch political change but also a dramatic awakening in the direction of *religare* –the etymological root of 'religion.' We need just as urgently to learn to bind our hands strongly together to make the dream a reality. We have a dream and we want to realize it!
